Office Action Summary	Examiner	Art Unit				
	Angela J. Martin	1795				
The MAILING DATE of this communication app	_	l				
Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
<u> </u>	Responsive to communication(s) filed on <u>16 November 2007</u> .					
	·					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>1-16</u> is/are pending in the application.						
4a) Of the above claim(s) <u>14 and 15</u> is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1-13 and 16</u> is/are rejected. 7)□ Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/o	r election requirement.					
O) Claim(s) are subject to restriction und/or clostion requirement.						
Application Papers						
9)☐ The specification is objected to by the Examiner.						
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a) All b) Some * c) None of:						
<ul> <li>1.☒ Certified copies of the priority documents have been received.</li> <li>2.☒ Certified copies of the priority documents have been received in Application No</li> </ul>						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.						
·						
Attachment(s)						
1) Notice of References Cited (PTO-892)  4) Interview Summary (PTO-413)						
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail D 5) Notice of Informal I

Application/Control Number:

10/658,148 Art Unit: 1795

#### **DETAILED ACTION**

1. This Office Action is responsive to the Amendment After Final Remarks filed on November 16, 2007. Applicant's arguments, with respect to the rejection(s) of claim(s) 1-13, and 16 under 35 USC 103 have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made as presented below.

### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-13, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. 5,302,471, in view of Miyazawa et al., U.S. Pat Application Pub. 2004/0081870 A1.

Ito et al., teach a control apparatus for a fuel cell stack comprising:

a fuel cell stack having a stacked body formed by stacking fuel cell units together (col.

4, lines 58-68 and col. 1, lines 1-2) and a pair of end plates sandwiching the stacked body therebetween (col. 5, lines 30-35); electrical heaters disposed near the ends of the stacked body or the end plates, respectively (col. 7, lines 4-16); and a control unit which controls the power generation operation in the fuel cell stack (col. 5, lines 1-2), and which is operatively connected to the electrical heaters, wherein the control unit is

Application/Control Number:

10/658,148 Art Unit: 1795

adapted to operate the electrical heaters (col. 6, lines 32-39). A control apparatus for a fuel cell stack according to claim 1, wherein each of the electrical heaters is disposed between each of the end plates and one of the fuel cell units disposed at each end of the fuel cell stack (col. 7, lines 4-16). A control apparatus for a fuel cell stack according to claim 1, wherein the fuel cell stack further includes a pair of terminal plates each of which is disposed between each of the end plate and one of the fuel cell units disposed at each end of the fuel cell stack, and wherein each of the electrical heaters is embedded in each of the terminal plates (col. 7, lines 4-16). A control apparatus for a fuel cell stack according to claim 1, wherein each of the electrical heaters is embedded in each of the end plates (col. 7, lines 4-16). A control apparatus for a fuel cell stack according to claim 1, wherein the control unit is adapted to execute the power generation operation in the fuel cell stack in order to supply electrical energy to the electrical heaters (col. 6, lines 32-39). A control apparatus for a fuel cell stack according to claim 1, further comprising temperature sensors for measuring temperature of the fuel cell units, wherein the control unit is adapted to control the electrical heaters depending on the temperature of the fuel cell units measured by the temperature sensors (col. 4, lines 58-68). A control apparatus for a fuel cell stack according to claim 11, wherein one of the temperature sensors is attached to one of the fuel cell units disposed in the middle of the fuel cell stack (col. 4, lines 58-68 and col. 5, lines 1-2). A control apparatus for a fuel cell stack according to claim 12, wherein the control unit is adapted to control the electrical heaters depending on the difference between the temperature of at least one of the fuel cell units disposed in the middle of the fuel cell

Art Unit: 1795

stack and the temperature of at least one of the fuel cell units disposed at the ends of the fuel cell stack (Fig. 7). A control apparatus for a fuel cell stack according to claim 12, wherein the electrical heaters are adapted to heat the fuel cell stack (claim 7).

Miyazawa et al., teach a control apparatus comprising a water purging device for purging water which is generated during a power generation operation in the fuel cell stack, and which is held in the fuel cell units (0021).

Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to insert the teachings of Miyazawa et al., into the teachings of Ito et al., it would be advantageous to install a purging device into a fuel cell system, where the heating is increased after stopping the fuel cell operation; "Considering that steam will accumulate in the fuel cell 11 when the temperature rises, a gas purge outlet may be installed in the fuel cell 11." (Miyazawa et al., 0021).

### Conclusion

The prior art made of record and not relied upon is considered pertinent to 4. applicant's disclosure. Omoto et al., U.S. Pat. Application Pub. 2005/0112423 A1, teach purging in a fuel cell system when stopping operation of the power generation system.

## Response to Arguments

Applicant's arguments with respect to above claims have been considered but 5. are moot in view of the new ground(s) of rejection.
